

Your voice counts! July 2017

You said...we did...

PARENTS

We would like to know when our children are due an award in assembly, so we can attend if possible.

We introduced text messages to alert you of the Wonderful Writing, Marvellous Mathematician and Secret Agent awards this year. As a result, your attendance to reward assemblies has increased significantly—thank you.

We would like there to be more off-site visits for our children. And we are happy to contribute more.

We would like more frequent and improved communication from school about children's progress.

We conducted a survey to understand the detail that you required. As a result we have bought into an app called **MarvellousMe**, which will be our main communication tool from September. Here you will receive homework assignments, resources and dates, class letters and newsletters and reward badges. We will also use this as a tool for informing you about rewards due in assemblies. You will receive the information to sign up in September—and you can have as many parents or other relatives as you wish.

We conducted a survey to see if there would be financial support for increased school visits. Thank you for your generous responses. As a result, this term there have been visits to Kingswood, Trentham Gardens, Scifest and Walsall University Campus.

PUPILS

We introduced 'Posh Elevenses' at break time where children join Mr Bradbury and Mrs Davis for squash, a cake and a chat. They like this a lot more.

Some of us don't like the 'Posh Table' reward for Secret Agents as we don't like to eat on the stage in front of others and miss sitting by our friends.

We like to play with toys on the playground as it stops us from getting bored.

We do not feel safe when the traffic goes too fast on the carpark.

We have increased the equipment on the playgrounds and ordered more using the Sainsburys Vouchers donated to school. In the summer there will be a tyre park and a traverse wall fitted on KS1 due to PTFA fundraising and a grant won by Mr Bradbury. Thank you for all of your donations and vouchers.

We invested in speed bumps on both the back and the front car park which has had a good effect in reducing the speed that vehicles enter. We also improved the layout by adding lines to the front carpark, in order to maximise space available.

Thank you for
